## PENJELASAN STRATEGI KEBERLANJUTAN [OJK A.1]

### EXPLANATION OF SUSTAINABILITY STRATEGY [OJK A.1]

Bank Artha Graha Internasional berkomitmen terhadap keberhasilan implementasi keuangan berkelanjutan di Indonesia. Komitmen tersebut bermula pada akhir tahun 2015 dimana Otoritas Jasa Keuangan (OJK) dengan dukungan *technical assistance* dari WWF Indonesia, mengajak Bank Artha Graha Internasional bersama dengan 7 Bank lainnya merintis *First Step to be a Sustainable Bank*, yaitu mengintegrasikan unsur lingkungan, sosial dan tata kelola dalam menerapkan prinsip-prinsip berkelanjutan ke dalam praktik perbankan, sebagaimana tertuang dalam *Roadmap Keuangan Berkelanjutan di Indonesia* yang diterbitkan oleh OJK.

Selaras dengan itu, komitmen pemerintah untuk menekan emisi rendah karbon turut menjadi perhatian Bank dalam menerapkan strategi usaha berkelanjutan melalui penerapan ekonomi hijau. Sebagaimana tertuang dalam Visi dan Misi serta nilai-nilai perusahaan untuk menjadi institusi keuangan terkemuka dengan kinerja prima yang berkelanjutan dan berkontribusi dalam pembangunan Indonesia. Dengan ditunjang oleh *Human Capital* yang memahami dan memiliki pengetahuan tentang *sustainable finance*, Bank diharapkan mampu menciptakan pembangunan berkelanjutan dengan menyelaraskan kepentingan ekonomi, sosial, dan lingkungan hidup.

### BOARD OF DIRECTORS EXPLANATION [GRI 2-22][FSA D.1]

Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Puji syukur kami panjatkan ke hadirat Tuhan yang Maha Esa karena atas kehendak-Nya, PT Bank Artha Graha Internasional Tbk dapat membukukan kinerja terbaik pada tahun 2023. Pendapatan bunga bersih, laba operasional, laba sebelum pajak maupun laba tahun berjalan menunjukkan peningkatan dibanding tahun sebelumnya. Selain melanjutkan tren positif pencapaian tahun 2022, keberhasilan tersebut sekaligus menunjukkan peningkatan kepercayaan para pemangku kepentingan kepada Bank.

Peningkatan kepercayaan pemangku kepentingan ditopang oleh banyak faktor di antaranya ketepatan kebijakan dan inisiatif strategis yang ditetapkan Bank, dan kebijakan tersebut diimplementasikan secara maksimal selama tahun pelaporan. Selain itu, pencapaian Bank juga dipengaruhi oleh membaiknya kondisi ekonomi dan sosial di Tanah Air di antaranya keberhasilan pemerintah menangani pandemi COVID-19, bahkan ditindaklanjuti dengan pencabutan kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) pada akhir Desember 2022. Pencapaian tersebut merupakan pondasi yang kuat bagi masyarakat untuk beraktivitas dan berkegiatan secara leluasa, termasuk kembali bekerja di berbagai lapangan usaha, yang bermuara dengan bergeraknya roda perekonomian sehingga mendorong bertumbuhnya ekonomi Indonesia tahun 2023.

Merujuk data Badan Pusat Statistik (BPS), pertumbuhan ekonomi Indonesia tahun 2023 tercatat sebesar 5,05% year-on-year (yoy). Pencapaian itu diraih di tengah melambatnya perekonomian global dan menurunnya harga komoditas unggulan. Dari sisi angka, pertumbuhan ekonomi tahun 2023 melambat dibandingkan tahun 2022 yang mencapai 5,31%. Walau demikian, pertumbuhan ekonomi Indonesia tersebut masih di atas prediksi sejumlah lembaga ekonomi global. Bank Dunia (*World Bank*), Dana Moneter Internasional (IMF), dan *Asian Development Bank* (ADB), ketiganya memperkirakan pertumbuhan ekonomi Indonesia mencapai 5%.

Dear Shareholders and Stakeholders,

Praise be to God Almighty for His blessings, PT Bank Artha Graha Internasional Tbk was able to record the best performance in 2023. Net interest income, operating profit, profit before tax and profit for the year showed an increase compared to the previous year. In addition to continuing the positive trend of 2022 achievements, the success also demonstrated an increase in stakeholders' trust in the Bank.

The increase in stakeholder trust was supported by many factors, including the accuracy of the policies and strategic initiatives set by the Bank, and these policies were implemented to the maximum during the reporting year. In addition, the Bank's achievements were also influenced by improving economic and social conditions in the country, including the government's success in handling the COVID-19 pandemic, in addition to the revocation of the policy on the Enforcement of Restrictions on Community Activities (PPKM) at the end of December 2022. This was a strong foundation for the community to carry out activities and activities freely, including returning to work in various business fields, which led to the movement of the economy so as to encourage the growth of the Indonesian economy in 2023.

Referring to data from the Central Statistics Agency (BPS), Indonesia's economic growth in 2023 was recorded at 5.05% year-on-year (yoy). This achievement was achieved amid the slowdown in the global economy and the decline in leading commodity prices. In terms of numbers, economic growth in 2023 slowed down compared to 2022 which reached 5.31%. However, Indonesia's economic growth was still above the predictions of a number of global economic institutions. The World Bank, International Monetary Fund (IMF), and Asian Development Bank (ADB), all three estimated Indonesia's economic growth to reach 5%.

## Kinerja Lapangan Jasa Keuangan/Perbankan Tahun 2023

Pertumbuhan ekonomi Indonesia tahun 2023 ditopang oleh bertumbuhnya 17 lapangan usaha yang dijadikan dasar perhitungan pertumbuhan ekonomi tahunan oleh BPS. Salah satu lapangan usaha yang tumbuh positif adalah Jasa Keuangan dan Asuransi, termasuk di dalamnya industri perbankan, dengan pertumbuhan sebesar 4,77%, meningkat signifikan dibanding tahun 2022 yang mencapai 1,93%.

## Financial Services/Banking Industry Performance in 2023

Indonesia's economic growth in 2023 was supported by the growth of 17 business fields used as the basis for calculating annual economic growth by BPS. One of the business fields that grew positively was Financial and Insurance Services, including the banking industry, with growth of 4.77%, a significant increase compared to 2022 which reached 1.93%.

Menurut OJK, di tengah kondisi ketidakpastian dan perlambatan pertumbuhan ekonomi global, industri perbankan Indonesia per November 2023 tetap *resilient* dan berdaya saing didukung oleh tingkat profitabilitas (ROA) dan permodalan (CAR) yang relatif tinggi masing-masing sebesar 2,73% dan 27,89%. Dari sisi kinerja intermediasi, pada November 2023, secara yoy, kredit meningkat Rp618,43 triliun atau tumbuh 9,74% menjadi Rp6.965,90 triliun. Pertumbuhan tertinggi terjadi pada kredit modal kerja sebesar 10,14% yoy.

Sementara itu, dari sisi pertumbuhan Dana Pihak Ketiga (DPK), hingga November 2023, tercatat tumbuh 3,04% yoy atau menjadi Rp8.216,21 triliun, dengan deposito menjadi kontributor pertumbuhan terbesar yaitu 3,50% yoy. OJK mencatat, beberapa hal yang memengaruhi perlambatan pertumbuhan DPK di antaranya adalah pertumbuhan DPK yang tinggi pada masa pandemi yang mengakibatkan *high base effect* pada pertumbuhan DPK setelahnya, penggunaan dana internal untuk operasional dan ekspansi perusahaan, konsumsi masyarakat yang kembali meningkat dengan berakhirnya status pandemi, serta dampak semakin banyaknya alternatif instrumen penempatan dana selain DPK.

Sebagai bagian dari lembaga jasa keuangan, khususnya di industri perbankan, Bank turut terdampak positif atas pertumbuhan ekonomi Indonesia yang berkelanjutan pada tahun 2023, termasuk pertumbuhan di lapangan usaha jasa keuangan tersebut. Melalui Laporan Keberlanjutan inilah, Bank menyampaikan keberhasilan kinerja aspek ekonomi tahun 2023, sebagaimana diatur dalam Peraturan Otoritas Jasa Keuangan No. 51/POJK.03/2017 tentang Penerapan Keuangan Berkelanjutan Bagi Lembaga Jasa Keuangan, Emiten, dan Perusahaan Publik atau POJK Keuangan Berkelanjutan. Tak hanya pencapaian kinerja aspek ekonomi, sesuai Peraturan OJK tersebut, laporan ini juga mencakup berbagai rencana, implementasi dan kebijakan terkait kinerja aspek lingkungan dan sosial sebagai sebuah keselarasan.

Bank berkomitmen untuk menerapkan keuangan berkelanjutan sebagaimana diatur dalam POJK No. 51/POJK.03/2017 tentang Penerapan Keuangan Berkelanjutan bagi Lembaga Jasa Keuangan, Emiten, dan Perusahaan Publik atau POJK Keuangan Berkelanjutan. Menurut peraturan ini, keuangan berkelanjutan adalah dukungan menyeluruh dari sektor jasa keuangan untuk menciptakan pertumbuhan ekonomi berkelanjutan dengan menyelaraskan kepentingan ekonomi, lingkungan hidup, dan sosial.

Keselarasan antara aspek ekonomi, lingkungan hidup dan sosial merupakan suatu keharusan karena fungsi suatu perusahaan bukan hanya mencetak laba tetapi juga dituntut menjaga kelestarian lingkungan hidup dan menunjukkan

*According to OJK, in the midst of uncertainty and slowing global economic growth, the Indonesian banking industry as of November 2023 remained resilient and competitive, supported by relatively high levels of profitability (ROA) and capitalization (CAR) of 2.73% and 27.89%, respectively. In terms of intermediation performance, credit increased by IDR618.43 trillion or grew 9.74% to IDR6,965.90 trillion in November 2023 on a yoy basis. The highest growth occurred in working capital loans of 10.14% yoy.*

*Meanwhile, until November 2023, Third Party Fund (DPK) recorded growth of 3.04% yoy to IDR8,216.21 trillion, with deposits being the largest contributor to growth at 3.50% yoy. OJK noted that some aspects that influenced the slowing growth of deposits included high deposit growth during the pandemic which resulted in a high base effect on subsequent deposit growth, the use of internal funds for company operations and expansion, increased public consumption with the end of the pandemic status, and the impact of the increasing number of alternative fund placement instruments other than deposits.*

*As part of a financial services institution, especially in the banking industry, the Bank was positively affected by Indonesia's sustainable economic growth in 2023, including growth in the financial services business field. Through this Sustainability Report, the Bank presents the success of the economic aspect performance in 2023, as stipulated in the Financial Services Authority Regulation No. 51/POJK.03/2017 concerning the Implementation of Sustainable Finance for Financial Services Institutions, Issuers, and Public Companies or POJK Sustainable Finance. In addition to presenting the achievement of economic aspect performance in accordance with the OJK Regulation, this report also includes various plans, implementation and policies related to the performance of environmental and social aspects as a harmony.*

*The Bank is committed to implementing sustainable finance as stipulated in POJK No. 51/POJK.03/2017 on the Implementation of Sustainable Finance for Financial Services Institutions, Issuers, and Public Companies or POJK Sustainable Finance. According to this regulation, sustainable finance is the comprehensive support of the financial services sector to create sustainable economic growth by harmonizing economic, environmental and social interests.*

*Alignment between economic, environmental and social aspects is a must because the function of a company is not only to make a profit but also to preserve the environment and show concern for social issues. Moreover, the Bank*

kepedulian pada isu-isu sosial. Lebih dari itu, Bank meyakini keselarasan ketiga aspek merupakan pondasi penting untuk mewujudkan bisnis yang berkesinambungan dengan pencapaian kinerja yang optimal.

Berkaitan dengan penerapan keuangan berkelanjutan, bahkan Bank telah memberikan dukungan sejak fase prakondisi pada November 2015. Hal itu ditandai dengan keikutsertaan Bank sebagai salah satu dari delapan bank yang menginisiasi terbentuknya Inisiatif Keuangan Berkelanjutan Indonesia (IKBI) bersama WWF Indonesia. Kedelapan bank yang mewakili 46% aset perbankan Indonesia tersebut tergabung dalam kelompok *The First Movers on Sustainable Banking*.

Dukungan lain terhadap keuangan berkelanjutan juga direalisasikan dengan menyusun Rencana Aksi Keuangan Berkelanjutan (RAKB), seperti diatur dalam pasal 4 ayat (1) POJK Keuangan Berkelanjutan. RAKB yang menjadi bagian tidak terpisahkan dengan Rencana Bisnis Bank (RBB) berisi berbagai rencana, program dan kebijakan strategis sebagai implementasi prinsip-prinsip keuangan berkelanjutan. Bank meyakini implementasi RAKB melalui program-program strategis dan prioritas merupakan kebijakan yang tepat dan searah dengan konsep pembangunan berkelanjutan yang tengah dijalankan di Indonesia. Dalam RAKB Tahun 2023, Bank menetapkan tiga program prioritas, yaitu pengembangan kapasitas internal; penyesuaian organisasi, manajemen risiko, tata kelola, dan/atau standar prosedur operasional; serta pengembangan produk dan/atau jasa keuangan berkelanjutan, termasuk peningkatan portofolio pembiayaan, investasi atau penempatan pada instrumen keuangan atau proyek yang sejalan dengan penerapan keuangan berkelanjutan. Selama tahun pelaporan, ketiga program telah dilaksanakan Bank dengan baik.

*believes that the harmony of the three aspects is an important foundation for realizing a sustainable business with optimal performance achievement.*

*In relation to the implementation of sustainable finance, the Bank even provided support since the precondition phase in November 2015. This was marked by the Bank's participation as one of the eight banks that initiated the formation of the Indonesian Sustainable Finance Initiative (IKBI) with WWF Indonesia. ## Strategi Pencapaian Target

Keselajaran dan kesetaraan merupakan prinsip dasar dalam penerapan keuangan berkelanjutan. Oleh karena itu, secara terus-menerus aspek lingkungan dan sosial berkelanjutan akan dipengaruhi oleh pencapaian Bank dalam mewujudkan target-target kinerja aspek ekonomi yang disampaikan dalam Rencana Bisnis Bank (RBB) dan Rencana Aksi Keuangan Berkelanjutan (RAKB) Tahun 2023. Sepanjang tahun 2023,

## Target Achievement Strategy

*Harmony and equality are the basic principles in the implementation of sustainable finance. Therefore, continuously the aspects of environmental and social sustainability will be influenced by the Bank's achievement in realizing the performance targets of the economic aspects presented in the Bank's 2023 Business Plan (RBB) and Sustainable Finance Action Plan (RAKB). Throughout*

Bank telah mengembangkan strategi dan upaya yang dibangun sesuai dengan dinamika lingkungan eksternal dan internal dalam rangka integrasi mewujudkan ketangguhan yang dituangkan dalam RBB dan RAKB Tahun 2023.

Untuk mengukuhkan strategi tersebut, Bank secara konsisten memperkuat kapasitas internal perusahaan guna mendorong akselerasi bisnis di masa pemulihan ekonomi dengan strategi yang berfokus pada penyediaan layanan perbankan pilihan masyarakat yang terpercaya dan profesional. Salah satu langkah strategis yang dijalankan Bank di tahun 2023 adalah melanjutkan target akuisisi 1 juta nasabah melalui akselerasi transformasi *digital banking*. Hal ini dilakukan melalui kerjasama B2B dengan *partner* pihak ketiga dan didukung dengan *upgrade core banking system*.

Selanjutnya, berkaca pada tingkat suku bunga acuan tahun yang 2023 masih relatif tinggi seiring dengan tingkat inflasi pasar global yang masih tinggi dan adanya ketidakpastian kondisi ekonomi global ke depan, maka pada tahun 2023, Bank lebih fokus kepada pertumbuhan dana murah (CASA) dan mengurangi porsi dana mahal dari sisi pendanaan. Sementara itu dari sisi pinjaman, Bank menerapkan strategi pertumbuhan yang lebih selektif dengan berfokus pada sektor-sektor yang memiliki potensi kuat serta *exposure* minimum terhadap gejolak ekonomi global.

## Prospek dan Peluang

Keberhasilan pemerintah mencatatkan pertumbuhan ekonomi berkelanjutan pada tahun 2023 merupakan momentum untuk mewujudkan kehidupan sosial dan ekonomi yang stabil sebagaimana kondisi sebelum pandemi COVID-19. Kehidupan tersebut akan mendorong bertumbuhnya berbagai lapangan usaha, termasuk Jasa Keuangan dan Asuransi di mana perbankan termasuk di dalamnya. Pertumbuhan lapangan usaha tersebut merupakan peluang bagi Bank untuk terus mengembangkan diri guna meningkatkan kinerja pada tahun-tahun mendatang. Optimisme perlu dibangun karena prospek lapangan usaha Jasa Keuangan dan Asuransi, termasuk perbankan, diyakini akan terus membaik di masa depan.

Bank telah menetapkan berbagai target, terkhusus pada aspek ekonomi, serta rencana strategis untuk mencapainya. Target tersebut di antaranya pendapatan bunga bersih sebesar Rp909,11 miliar dan laba bersih tahun berjalan ditargetkan mencapai Rp178,75 miliar.

Guna mencapai target-target di atas, kebijakan strategis yang ditetapkan Bank tahun 2024 antara lain tetap fokus pada peningkatan dana murah (CASA) serta akuisisi nasabah baru. Sesuai dengan visi korporasi yaitu target akuisisi mencapai satu juta nasabah, Bank telah menyiapkan strategi akuisisi, baik secara *online* maupun *offline*. Layanan QRIS juga menjadi salah satu produk yang dapat meningkatkan CASA maupun nasabah baru, khususnya

*2023, the Bank developed strategies and efforts built in accordance with the dynamics of the external and internal environment in the context of integration to realize the resilience outlined in the RBB and RAKB Year 2023.*

*To solidify the strategy, the Bank consistently strengthened its internal capacity to drive business acceleration during the economic recovery with a strategy that focused on providing trusted and professional banking services of the people's choice. One of the strategic steps taken by the Bank in 2023 was to continue the target of acquiring 1 million customers through the acceleration of digital banking transformation. This was accomplished through B2B cooperation with third party partners and supported by upgrading the core banking system.*

*Furthermore, reflecting that the benchmark interest rate in 2023 remained relatively high along with the high global market inflation rate and the uncertainty of global economic conditions going forward, the Bank focused more on the growth of low-cost funds (CASA) and reduced the portion of expensive funds from the funding side in 2023. Meanwhile, on the loan side, the Bank was implementing a more selective growth strategy by focusing on sectors with strong potential and minimum exposure to global economic turmoil.*

## Prospects and Opportunities

*The government's success in recording sustainable economic growth in 2023 is a momentum to realize a stable social and economic life as it was before the COVID-19 pandemic. This will encourage the growth of various business fields, including Financial and Insurance Services in which banking is included in it. The growth of these businesses is an opportunity for the Bank to continue to develop itself to improve performance in the coming years. Optimism needs to be built because the prospects for the Financial and Insurance Services business field, including banking, are believed to continue to improve in the future.*

*The Bank has set various targets, especially in the economic aspect, as well as strategic plans to achieve them. The targets include net interest income of IDR909.11 billion and net profit for the year of IDR178.75 billion.*

*In order to achieve the above targets, the strategic policies set by the Bank in 2024 include continuing to focus on increasing low-cost funds (CASA) and acquiring new customers. In accordance with the corporate vision, which is the acquisition target of one million customers, the Bank has prepared an acquisition strategy, both online and offline. QRIS service is also one of the products that can increase CASA and new customers, especially the MSME merchant*

segmentasi *merchant* UMKM. Dengan semangat kerja keras dan bersinergi di semua lini, Bank optimis dapat menggapai target-target tersebut demi mewujudkan bisnis yang berkelanjutan.

## Apresiasi

Keberhasilan Bank membukukan kinerja yang optimal dari tahun ke tahun mencerminkan operasional usaha yang sehat secara bisnis. Selain dipengaruhi oleh faktor eksternal seperti pertumbuhan ekonomi nasional serta meningkatnya kemampuan ekonomi masyarakat, termasuk menjalankan usaha, pencapaian tersebut tak lepas dari ketepatan implementasi atas berbagai rencana strategis yang ditetapkan Bank. Terlebih lagi, implementasi rencana strategis tersebut mendapatkan dukungan optimal dari segenap pemangku kepentingan, baik internal maupun eksternal.

Moreover, the implementation of these strategic plans received optimal support from all stakeholders, both internal and external.*

*With regard to the above achievements and factual conditions, we would like to thank the Board of Commissioners for supervising and providing direction so that the Board of Directors was able to successfully execute the strategic plan. ## PELIBATAN PIHAK LOKAL [GRI 2-6]

### LOCAL PARTY ENGAGEMENT [GRI 2-6]

Bank dengan keberadaannya memberikan manfaat sebesar-besarnya bagi masyarakat, terkhusus pada aspek ekonomi. Upaya nyata untuk menguatkan komitmen itu adalah Bank membuka kesempatan kepada warga lokal untuk bergabung menjadi pegawai dengan mengikuti proses rekrutmen dan memenuhi kualifikasi yang diperlukan Bank. Dalam laporan ini, warga lokal adalah mereka yang berdomisili dan memiliki Kartu Tanda Penduduk dengan provinsi yang sama dengan alamat Bank beroperasi. Berdasarkan kategori ini, per 31 Desember 2023, Bank memiliki pegawai dari warga lokal sebanyak 915 turun dibanding tahun 2022 dengan 1.010 orang. [GRI 3-3, 202-2]

Sejalan dengan kebijakan untuk merekrut warga lokal, Bank juga berkomitmen untuk menjalin kerja sama dengan pemasok lokal guna mencukupi kebutuhan barang dan jasa. Kerja sama dalam rantai pasokan diperlukan karena Bank tidak bisa memenuhi kebutuhan barang dan jasa tersebut secara mandiri. Pemasok lokal adalah mereka yang menjalankan usaha dan berdomisili di Indonesia, termasuk di dalamnya pemasok dari kalangan Usaha Mikro, Kecil dan Menengah (UMKM). Apabila pemasok lokal tidak bisa memenuhi barang dan jasa yang dibutuhkan atau dengan pertimbangan tertentu, maka Bank akan menjalin kerja sama dengan pemasok luar negeri/asing yaitu pemasok yang menjalankan usaha dan berdomisili di luar Indonesia. [GRI 3-3]

Bank membutuhkan dukungan rantai pasokan agar kebutuhan atas barang dan jasa bisa dipenuhi oleh pemasok/mitra di antaranya jasa kontraktor, jasa konsultan perencana, jasa konsultan pengawas, jasa appraisal, jasa konsultan lainnya, jasa ekspedisi dan porto surat, jasa keamanan, jasa kebersihan, dan kearsipan atau dokumentasi. Secara prinsip, Bank menerapkan inklusif bisnis dengan memberikan kesempatan yang sama kepada seluruh mitra pemasok sepanjang memenuhi standar dan kriteria kualitas, harga, faktor keamanan serta mempertimbangkan waktu pengiriman atau penyelesaian pekerjaan. [GRI 3-3]

Untuk mengukuhkan transparansi, efisien, efektif sekaligus mengurangi penggunaan kertas, pengadaan barang dan jasa dilakukan Bank dengan menerapkan sistem *e-Procurement*, setiap mitra pemasok yang ingin menjalin kerja sama harus melewati verifikasi terlebih dahulu, baik secara kelengkapan administrasi, rekam jejak dan prestasi atau nilai tambah yang dapat diberikan. Secara berkala, Bank melakukan evaluasi terhadap kinerja mitra untuk menentukan keberlanjutan kerja sama di waktu berikutnya. [GRI 3-3]

*Through its presence, the Bank provides maximum benefits to the community, especially in the economic aspect. To strengthen this commitment, the Bank opens opportunities for local residents to join as employees by following the recruitment process and meeting the qualifications required by the Bank. In this report, local residents are those who are domiciled and have an Identity Card with the same province as the operating Bank address. Based on this category, as of December 31, 2023, the Bank had 915 employees from local residents, an decrease compared to 2022 with 1,010 employees. [GRI 3-3, 202-2]*

*In line with the policy to recruit local residents, the Bank is also committed to cooperating with local suppliers to meet the needs of goods and services. Cooperation in the supply chain is needed because the Bank cannot meet the needs of these goods and services independently. Local suppliers are those who run a business and are domiciled in Indonesia, including suppliers from Micro, Small and Medium Enterprises (MSMEs). If local suppliers cannot fulfill the goods and services needed or with certain considerations, the Bank will cooperate with foreign suppliers, namely suppliers who run a business and are domiciled outside Indonesia. [GRI 3-3]*

*The Bank needs supply chain support to ensure that its needs for goods and services can be met by suppliers/partners including contractors, planning consultant services, supervisory consultant services, appraisal services, other consulting services, expedition and porto mail services, security services, cleaning services, and archives or documentation. In principle, the Bank implements business inclusiveness by providing equal opportunities to all supplier partners as long as they meet standards and criteria of quality, price, safety factors and consider delivery time or completion of work. [GRI 3-3]*

*To strengthen transparency, efficiency, effectiveness while reducing the use of paper, the procurement of goods and services is carried out by the Bank by implementing the e-Procurement system, every supplier partner who wants to establish cooperation must first pass verification, both in terms of administrative completeness, track record and achievements or added value that can be provided. Periodically, the Bank evaluates the performance of partners to determine the sustainability of cooperation in the next time. [GRI 3-3]*

### SUSTAINABILITY GOVERNANCE

#### Komitmen Penerapan Tata Kelola

Tata Kelola Perusahaan yang Baik (*Good Corporate Governance*), yang selanjutnya disebut GCG, merupakan pondasi bagi Bank Artha Graha Internasional dalam menjalankan usaha. Dengan penerapan GCG secara paripurna di semua lini, maka jalannya Bank dipastikan berada pada jalur yang benar (*on the right track*), sekaligus mengurangi risiko terjadinya mismanajemen. Implementasi GCG juga akan membuat entitas bisnis lebih efisien dalam menjalankan operasional usaha, serta mampu mengukur target kinerja manajemen.

Terkhusus bagi perusahaan publik, penerapan GCG akan meningkatkan kepercayaan publik, terutama pemegang saham, bahwa investasi mereka dikelola dengan baik dan aman. Dengan pengelolaan perusahaan yang baik, dua keuntungan yang lazim diharapkan investor, yaitu dividen dan *capital gain*, bisa terwujud. Dividen adalah bagian laba atau pendapatan perusahaan yang besarnya ditetapkan oleh Direksi serta disahkan oleh rapat umum pemegang saham untuk dibagikan kepada para pemegang saham. Adapun *capital gain* adalah selisih antara harga beli dan harga jual saham. *Capital gain* terbentuk dengan adanya aktivitas perdagangan saham di pasar sekunder.

Bercermin pada banyaknya manfaat di atas, penerapan GCG merupakan sebuah kewajiban, tidak sekadar kepatuhan terhadap regulasi. Bank meyakini penerapan GCG akan membuat perusahaan mempunyai kekuatan dan kemampuan dalam menciptakan pertumbuhan dan meningkatkan kinerja untuk mewujudkan target bisnis yang telah ditetapkan.

Lebih lanjut, untuk mendapatkan hasil terbaik, Bank senantiasa mengikuti perkembangan terkini tentang GCG, serta berkomitmen untuk menyempurnakan penerapan prinsip-prinsip GCG. Untuk itu, dukungan dari pemegang saham (*shareholder*) maupun para pemangku kepentingan (*stakeholder*), baik internal maupun eksternal, sangat dibutuhkan. Dengan semakin sempurnanya penerapan prinsip-prinsip GCG, maka kinerja Bank akan meningkat, mampu menjawab tantangan zaman, serta terus tumbuh, berkembang dan berkelanjutan.

#### Commitment to Governance Implementation

*Good Corporate Governance, hereinafter referred to as GCG, is the foundation for Bank Artha Graha Internasional in running its business. With the full implementation of GCG at all levels, the Bank's operations are ensured to be on the right track, while reducing the risk of mismanagement. GCG implementation will also ensure that business entities are more efficient in running business operations, and able to measure management performance targets.*

*Especially for public companies, the implementation of GCG will increase public confidence, especially shareholders, that their investments are well managed and safe. With good company management, two benefits that investors commonly expect, namely dividends and capital gains, can be realized. Dividends are part of the company's profit or income, the amount of which is determined by the Board of Directors and authorized by the shareholders' meeting to be distributed to shareholders. Capital gain is the difference between the purchase price and the selling price of shares. Capital gains are formed by stock trading activities in the secondary market.*

*Reflecting on the many benefits above, GCG implementation is an obligation, not just compliance with regulations. The Bank believes that the implementation of GCG will give the company the strength and ability to create growth and improve performance to realize the business targets that have been set.*

*To achieve the best results, the Bank always follows the latest developments in GCG, and is committed to improving the implementation of GCG principles. For this reason, support from shareholders and stakeholders, both internal and external, is needed. By perfecting the implementation of GCG principles, the Bank's performance will improve, be able to respond to the challenges of the times, and continue to grow, develop and be sustainable.*

# MOMENTUM BANGKIT PASCAPANDEMI

## MOMENTUM TO RISE AFTER PANDEMIC

### Sekilas Ekonomi Global dan Nasional

### Global and National Economy at a Glance

Kondisi perekonomian global tahun 2023 masih diliputi ketidakpastian sejalan dengan dinamika perekonomian negara-negara maju yang berdampak ke global. Amerika Serikat masih dihadapkan pada inflasi yang berada di atas target, tingginya suku bunga, peningkatan tekanan fiskal, dan tergerusnya *excess saving* yang membayangi pelemahan ekonomi, China masih bergulat dengan pelemahan ekonomi pasca COVID-19, sedangkan Eropa kondisi ekonominya melemah dengan defisit fiskal yang meningkat diiringi oleh *core inflation* yang masih tinggi.

Selain faktor ekonomi, ketidakpastian perekonomian global juga dipengaruhi oleh kondisi geopolitik yang masih bergejolak. Perang di Rusia melawan Ukraina belum ada tanda-tanda akan berakhir, berikutnya disusul dengan terjadinya konflik di Timur Tengah, yaitu Israel melawan Palestina yang juga masih berkepanjangan. Kondisi tersebut menimbulkan *downside risk* terhadap prospek pertumbuhan ekonomi global, terlebih lagi ada kemungkinan perang akan melebar, terkhusus antara Israel vs Palestina.

Berkaca pada kondisi tersebut, lembaga ekonomi global seperti International Monetary Fund (IMF) dan Bank Dunia memprediksi pertumbuhan ekonomi global tahun 2023 melemah dibandingkan tahun sebelumnya. IMF melakukan revisi dengan menyebut angka pertumbuhan ekonomi global menjadi hanya 3%, sedangkan Bank Dunia justru menyebut angka 2,1%. Di sisi lain, inflasi diprediksi mencapai level 5,8%, lebih tinggi dibandingkan periode sebelum pandemi.

Di tengah perlambatan ekonomi global, merujuk data Badan Pusat Statistik (BPS), ekonomi Indonesia berhasil menunjukkan pertumbuhan berkelanjutan yaitu pada angka 5,04% (y-on-y). Walau melambat dibandingkan tahun 2022 yang mencapai 5,31%, pertumbuhan ekonomi Indonesia tersebut masih di atas prediksi sejumlah lembaga ekonomi global. Bank Dunia, IMF, dan *Asian Development Bank* (ADB), ketiganya memprediksi pertumbuhan ekonomi Indonesia mencapai 5%.

*Global economic conditions in 2023 were still surrounded by uncertainty in line with the economic dynamics of developed countries. The United States was faced with above-target inflation, high interest rates, increased fiscal pressures, and eroded excess savings that overshadowed economic weakness, China was still grappling with post-COVID-19 economic weakness, while Europe's economy was weakening with an increasing fiscal deficit along with high core inflation.*

*In addition to economic factors, global economic uncertainty was also influenced by volatile geopolitical conditions. The war in Russia against Ukraine showed no signs of ending, followed by the conflict in the Middle East, namely Israel against Palestine which is still ongoing to date. This condition posed a downside risk to the prospect of global economic growth, moreover there was a possibility that the war would worsen in scale, especially between Israel and Palestine.*

*Reflecting on these conditions, global economic institutions such as the International Monetary Fund (IMF) and the World Bank predicted that global economic growth in 2023 would weaken compared to the previous year. The IMF revised the global economic growth rate to only 3%, while the World Bank stated 2.1%. On the other hand, inflation was predicted to reach a level of 5.8%, higher than the pre-pandemic period.*

*In the midst of the global economic slowdown, referring to data from the Central Statistics Agency (BPS), Indonesia's economy managed to show sustainable growth at 5.04% (y-on-y). Despite slowing compared to 2022 which reached 5.31%, Indonesia's economic growth was still above the predictions of a number of global economic institutions. The World Bank, IMF, and Asian Development Bank (ADB), all three predicted Indonesia's economic growth to reach 5%.*

Terkhusus lapangan usaha Jasa Keuangan dan Asuransi, termasuk di dalamnya industri perbankan, pada tahun 2023 tumbuh sebesar 4,77%, meningkat signifikan dibanding tahun 2022 yang mencapai 1,93%. Menurut Otoritas Jasa Keuangan (OJK), sektor perbankan tetap resilien di tengah tantangan global. Lembaga ini menyebutkan hingga Oktober 2023 fungsi intermediasi tumbuh optimal dengan pertumbuhan kredit tercatat 8,99% secara tahunan (*y-on-y*). Berdasarkan tujuan pemberian kredit tercatat kredit investasi tumbuh 10,22%, kredit modal kerja tumbuh 8,10% dan kredit konsumsi tumbuh 9,28%. Adapun sektor ekonomi utama pendorong pertumbuhan kredit adalah pertambangan yang tumbuh sebesar 15,23%, transportasi 14,30%, pertanian 8,62%, dan perdagangan 5,70%.

Selaras dengan itu, pertumbuhan juga terjadi pada Dana Pihak Ketiga (DPK) yaitu sebesar 3,43%, yang ditopang oleh pertumbuhan giro sebesar 6,01%. Sejumlah indikator kinerja perbankan lainnya juga menunjukkan posisi aman. OJK mencatat, rasio-rasio perbankan terkait dengan masalah NPL (*Non Performing Loan*/kredit bermasalah) dan lainnya terpantau membaik, CAR (*Capital Adequacy Ratio*/rasio kecukupan modal) pun tinggi. Secara rinci, kualitas kredit tetap terjaga dengan rasio NPL net perbankan sebesar 0,77% dan NPL gross sebesar 2,42%. Adapun, CAR telah mencapai 27,48% pada Oktober 2023. Kondisi likuiditas perbankan pun masih ample (atau jauh di atas *threshold*) di mana rasio alat likuid per DPK (AL/DPK) mencapai level 26,36% di atas ambang batas 10%.

Berdasarkan Survei Orientasi Bisnis Perbankan OJK (SBPO) triwulanan dari OJK, indeks orientasi bisnis perbankan berada di level 62 atau zona optimis. Responden dari perbankan memperkirakan kinerja perbankan akan tetap terjaga pada kuartal IV/2023. Optimisme kinerja perbankan itu didorong oleh ekspektasi bahwa penyaluran kredit masih akan cukup baik sehingga berdampak pada peningkatan laba dan modal perbankan.

Secara umum, OJK menegaskan bahwa perbankan di Tanah Air pada 2023 resilien dan daya tahannya bagus. Dalam hal ini, Indonesia bisa lepas dari masalah global, misalnya krisis perbankan di AS yang merembet ke Swiss. Pada awal tahun 2023, berbagai kalangan mengkhawatirkan terjadi gangguan stabilitas sistem keuangan global imbas bangkrutnya sejumlah bank di AS.

OJK noted that banking ratios related to NPL (*Non Performing Loan*) and other issues were observed to improve, and CAR (*capital adequacy ratio*) was high. In detail, credit quality was maintained with a net NPL ratio of 0.77% and gross NPL ratio of 2.42%. Meanwhile, CAR reached 27.48% in October 2023. *Based on the quarterly OJK Banking Business Orientation Survey (SBPO) from OJK, the banking business orientation index was at level 62 or the optimistic zone. The optimism in the banking industry was driven by expectations that lending would still be relatively satisfactory, resulting in an increase in bank profits and capital.*

*In general, OJK confirmed that Indonesian banks in 2023 would remain resilient. In this case, Indonesia would be able to escape from global issues, such as the banking crisis in the US that spread to Switzerland. ## Distribusi Nilai Ekonomi

Berdasarkan kinerja ekonomi di atas, maka distribusi nilai ekonomi Bank, yaitu nilai ekonomi langsung yang dihasilkan, nilai ekonomi yang didistribusikan, dan nilai ekonomi yang ditahan, dapat dihitung. Nilai ekonomi langsung yang dihasilkan adalah sejumlah pendapatan yang diperoleh dari hasil kegiatan bisnis Bank. Sedangkan nilai ekonomi yang didistribusikan merupakan sejumlah pengeluaran yang didistribusikan sebagai bentuk kontribusi Bank dalam meningkatkan laju pertumbuhan ekonomi dan kesejahteraan para pemangku kepentingan, seperti pembayaran gaji, pajak, dividen, pembayaran untuk pemasok, maupun realisasi dana untuk masyarakat sebagai salah satu bentuk perwujudan Tanggung Jawab Sosial dan Lingkungan (TJSL), yang diimplementasikan melalui berbagai program Corporate Social Safety Responsibility (CSSR). Adapun nilai ekonomi yang ditahan adalah selisih antara nilai ekonomi yang dihasilkan dikurangi dengan nilai ekonomi yang didistribusikan, yang digunakan untuk pengembangan usaha Bank. [GRI 3-3, 201-1]

## Distribution of Economic Value

Based on the above economic performance, the distribution of the Bank's economic value, namely the direct economic value generated, the economic value distributed, and the economic value retained, can be calculated. The direct economic value generated is a certain amount of income obtained from the results of the Bank's business activities. Meanwhile, the economic value distributed is a number of expenditures distributed as a form of the Bank's contribution in increasing economic growth rate and welfare of stakeholders, such as payment of salaries, taxes, dividends, payments to suppliers, as well as the realization of funds for the community as a form of manifestation of Social and Environmental Responsibility (TJSL), which is implemented through various Corporate Social Safety Responsibility (CSSR) programs. The economic value retained is the difference between the economic value generated minus the economic value distributed, which is used for the Bank's business development. [GRI 3-3, 201-1]

## Penyaluran Produk Usaha Mikro, Kecil dan Menengah (UMKM)

Peran UMKM bagi perekonomian nasional tak bisa dipandang sebelah mata, bahkan unit usaha ini terbukti mampu bertahan pada masa-masa sulit, seperti pada saat krisis ekonomi tahun 1998 serta pada masa pandemi COVID-19. Dengan demikian sangat beralasan jika UMKM disebut sebagai pilar terpenting dalam perekonomian Indonesia. Peran penting UMKM tak lepas dari jumlahnya yang sangat besar, yaitu 64,2 juta unit, dengan rincian usaha mikro sebanyak 63,4 juta unit, usaha kecil 783,1 ribu unit, dan usaha menengah 60,7 ribu unit. UMKM juga telah berkontribusi dalam menyerap 119,6 juta atau 96,92% dari total tenaga kerja di unit usaha Indonesia. Dengan jumlah sebesar itu, UMKM berkontribusi terhadap Produk Domestik Bruto (PDB) Indonesia sebesar lebih dari 60% atau sekitar Rp8.573 triliun setiap tahunnya. Berkaca pada kondisi faktual tersebut Bank berkomitmen meningkatkan penyaluran pembiayaan/pembiayaan untuk sektor UMKM.

Per 31 Desember 2023, dari total pinjaman yang diberikan Bank, tercatat sebesar Rp328,58 miliar disalurkan kepada UMKM. Jumlah itu adalah 2,70% dari total kredit yang diberikan Bank.

## Kontribusi kepada Pembangunan Infrastruktur di Indonesia

Pembangunan infrastruktur merupakan salah satu fokus pemerintah dalam APBN Tahun 2023. Hal itu tidak terlepas dari besarnya manfaat pembangunan infrastruktur bagi Indonesia antara lain sebagai sarana meningkatkan konektivitas antar kawasan dan pemerataan pembangunan di daerah perkotaan maupun perdesaan. Selama tahun 2023, Kementerian Keuangan melaporkan realisasi anggaran infrastruktur mencapai Rp455,8 triliun, angka tertinggi dalam kurun waktu lima tahun pemerintahan Presiden Joko Widodo (Jokowi). Realisasi tersebut naik 22,2% dibandingkan dengan realisasi sepanjang 2022 yakni sebesar Rp372,8 triliun. Becermin pada pentingnya pembangunan infrastruktur, Bank turut berkontribusi dalam pembangunan sektor tersebut melalui pembiayaan proyek-proyek berikut:

## Distribution of Micro, Small and Medium Enterprises (MSMEs) Products

*The role of MSMEs for the national economy cannot be underestimated. These business units have proven to be able to survive in difficult times, such as during the economic crisis in 1998 and during the COVID-19 pandemic. Thus, it stands to reason that MSMEs are called the most important pillar in the Indonesian economy. The important role of MSMEs cannot be separated from their considerable size, which is 64.2 million units, with as many as 63.4 million micro enterprises, 783.1 thousand small businesses, and 60.7 thousand medium enterprises. MSMEs have also contributed to absorbing 119.6 million or 96.92% of the total workforce in Indonesian business units. Accordingly, MSMEs contribute to Indonesia's Gross Domestic Product (GDP) of more than 60% or around IDR8,573 trillion every year. Reflecting on these factual conditions, the Bank is committed to increasing the distribution of financing for the MSME sector.*

*As of December 31, 2023, of the total loans provided by the Bank, IDR328.58 billions were channeled to MSMEs. That amount was 2.70% of the total credit provided by the Bank.*

## Contribution to Infrastructure Development in Indonesia

*Infrastructure development is one of the government's focuses in the 2023 State Budget. This is inseparable from the huge benefits of infrastructure development for Indonesia, among others, as a means of increasing connectivity between regions and equitable distribution of development in urban and rural areas. In 2023, the Ministry of Finance reported that the realization of the infrastructure budget reached IDR455.8 trillion, the highest figure in the five-year administration of President Joko Widodo (Jokowi). This realization increased by 22.2% compared to the realization throughout 2022, which amounted to IDR372.8 trillion. Reflecting on the importance of infrastructure development, the Bank contributed to the development of the sector through financing the following projects:*

## Portofolio Produk dengan Manfaat Sosial

Upaya segenap pemangku kepentingan, termasuk industri perbankan, terhadap pengurangan *backlog* atau kesenjangan antara jumlah rumah terbangun dengan jumlah rumah menuai hasil. Otoritas resmi Kementerian Pekerjaan Umum dan Perumahan Rakyat (PUPR) mengutip data BPS dalam Survei Sosial Ekonomi Tahun 2023 menyatakan *backlog* kepemilikan rumah menunjukkan *trend* penurunan. Pada tahun 2023, *backlog* tercatat sebanyak 9,95 juta unit, turun dibanding tahun 2022, yang mencapai 10,5 juta unit. Angka tersebut turun dibanding tahun 2021 dengan *backlog* sebanyak 12,72 juta unit, dan tahun 2020 dengan 12,75 juta unit.

Sebagai bentuk tanggung jawab terhadap penyediaan rumah, terkhusus bagi Masyarakat Berpenghasilan Rendah (MBR), Bank turut berkontribusi untuk mengatasi *backlog* perumahan melalui KPR Fasilitas Likuiditas Pembiayaan Perumahan atau FLPP. Dalam pelaksanaannya, program ini dilaksanakan oleh Kementerian Pekerjaan Umum dan Perumahan Rakyat. Kebijakan ini diambil pemerintah sebagai bentuk bantuan dan pemerataan kepemilikan rumah. KPR FLPP dilengkapi dengan syarat pembayaran yang lebih mudah dibanding KPR non-subsidi. KPR FLPP memberikan kemudahan dengan masa tenor yang cukup panjang, angsuran rendah, dan keringanan iuran lainnya. Sama dengan tahun 2022 di mana Bank tidak menyalurkan KPR FLPP, pada tahun 2023, Bank juga tidak menyalurkan program tersebut.

## Product Portfolio with Social Benefits

The efforts of all stakeholders, including the banking industry, to reduce the *backlog* or gap between the number of houses built and the number of houses are reaping results. The official authority of the Ministry of Public Works and Public Housing (PUPR) quoted BPS data in the 2023 Socio-Economic Survey stating that the *backlog* of home ownership showed a downward trend. In 2023, the *backlog* was recorded at 9.95 million units, down from 10.5 million units in 2022. This figure decreased compared to 2021 with a *backlog* of 12.72 million units, and 2020 with 12.75 million units.

As a form of responsibility for the provision of housing, especially for Low-Income Communities (MBR), the Bank contributes to overcoming the housing *backlog* through the Housing Financing Liquidity Facility KPR or FLPP. In its implementation, this program is implemented by the Ministry of Public Works and Public Housing. This policy was taken by the government as a form of assistance and equalization of home ownership. KPR FLPP comes with easier payment terms than non-subsidized mortgages. KPR FLPP provides convenience with a long tenor period, low installments, and other fee waivers. Similar to 2022 where the Bank did not distribute KPR FLPP, in 2023, the Bank also did not distribute the program.

## Implikasi Finansial Serta Risiko dan Peluang Lain Akibat dari Perubahan Iklim

## Financial Implications and Other Risks and Opportunities of Climate Change

Saat ini warga dunia tengah menghadapi masalah besar yang menuntut kontribusi bersama untuk menanganinya. Masalah tersebut adalah perubahan iklim dan pemanasan global yang dampak negatifnya kian terasa. Dampak yang terjadi antara lain, cuaca ekstrem, suhu udara lebih panas dibanding sebelumnya, hujan turun lebih deras dan waktunya kian sulit ditebak; sebaliknya, saat musim kemarau datang maka waktunya lebih lama dari biasanya sehingga memicu gagal panen dan sebagainya. Tak hanya menimbulkan bencana lingkungan, perubahan iklim juga berdampak negatif terhadap kehidupan manusia dan makhluk hidup lainnya. [GRI 3-3]

The citizens of the world are currently facing a major problem that requires a joint contribution to tackle. The problem is climate change and global warming, whose negative impacts are increasingly being felt. The impacts include, among others, extreme weather, hotter temperatures than before, heavier rainfall and unpredictable timing; conversely, when the dry season comes, the time is longer than usual, triggering crop failure and so on. Not only does climate change cause environmental disasters, it also negatively impacts the lives of humans and other living things. [GRI 3-3]

Dampak negatif perubahan iklim yang dipicu oleh pemanasan global menjadi tantangan seluruh sektor bisnis dan industri di Indonesia, termasuk industri perbankan. Dampak tersebut antara lain semakin seringnya terjadi bencana hidrometeorologi, yaitu bencana yang diakibatkan oleh aktivitas cuaca seperti siklus hidrologi, curah hujan, temperatur, angin dan kelembapan. Bentuk bencana hidrometeorologi sangat beragam seperti banjir, badai, longsor, angin puyuh, dan sebagainya.

The negative impacts of climate change triggered by global warming are a challenge for all business and industry sectors in Indonesia, including the banking industry. These impacts include the increasingly frequent occurrence of hydrometeorological disasters, which are disasters caused by weather activities such as the hydrological cycle, rainfall, temperature, wind and humidity. The forms of hydrometeorological disasters are very diverse such as floods, storms, landslides, whirlwinds, and so on.

Lebih lanjut, apabila korban dari bencana tersebut adalah nasabah, maka hal tersebut akan meningkatkan risiko kredit bagi perbankan. Untuk mengantisipasi risiko tersebut, Bank telah menetapkan mitigasi berupa kegiatan penanaman pohon yang dilakukan oleh seluruh kantor Cabang dan pelaksanaan *Earth Hour* selama 90 menit untuk penghematan energi. 201-2]

Furthermore, if the victims of the disaster are customers, it will increase credit risk for banks. To anticipate these risks, the Bank has established mitigation in the form of tree planting activities carried out by all branch offices and the implementation of *Earth Hour* for 90 minutes to save energy. 201-2]

Selain berimplikasi negatif terhadap finansial, perubahan iklim juga menciptakan peluang bagi Bank untuk meluncurkan produk keuangan berkelanjutan yang didukung penerapan inovasi teknologi terkini yang lebih ramah lingkungan.

In addition to negative financial implications, climate change also creates opportunities for the Bank to launch sustainable financial products supported by the application of the latest technological innovations that are more environmentally friendly.

## Kewajiban Program Pensiun Manfaat Pasti dan Program Pensiun Lainnya

Bank memberikan imbalan pasca kerja kepada karyawan tetap yang telah mencapai usia pensiun normal pada umur 55 tahun berdasarkan Undang-Undang Nomor 6 Tahun 2023 tentang Penetapan Peraturan Pemerintah Pengganti Undang-Undang Nomor 2 Tahun 2022 tentang Cipta Kerja menjadi Undang-Undang dan PP No. 35 Tahun 2021 dan mengakui liabilitas imbalan pasca kerja sesuai dengan PSAK 24 (Revisi 2013) dengan mempertimbangkan amandemen PSAK 24 tahun 2015 dan sedikit penyesuaian PSAK 24 tahun 2016. Jumlah karyawan Bank yang berhak atas imbalan pasca kerja pada tanggal 31 Desember 2022 adalah 1.233 karyawan, dan sebanyak 1.114 karyawan pada 31 Desember 2023. [GRI 3-3, 201-3]

Imbalan pasca kerja kepada karyawan di Bank merujuk pada Undang-Undang (UU) Ketenagakerjaan No. 13/2003 yang di dalamnya telah ditentukan rumus tertentu untuk menghitung jumlah minimal imbalan pensiun. Dengan demikian, pada dasarnya, program pensiun berdasarkan UU Ketenagakerjaan adalah program imbalan pasti. Program pensiun imbalan pasti adalah program pensiun yang menetapkan jumlah imbalan pensiun yang akan diterima oleh karyawan pada saat pensiun, biasanya berdasarkan beberapa faktor seperti usia, masa kerja atau kompensasi.

Liabilitas imbalan pasca kerja merupakan nilai kini kewajiban imbalan pasti pada tanggal laporan posisi keuangan. Liabilitas imbalan pasca kerja dihitung setiap tahun oleh aktuaris independen menggunakan metode *projected unit credit*. Nilai kini kewajiban imbalan pasti ditentukan dengan mendiskontokan estimasi arus kas keluar masa depan dengan menggunakan tingkat suku bunga Obligasi Pemerintah dalam mata uang yang sama dengan mata uang imbalan yang akan dibayarkan dan waktu jatuh tempo yang kurang lebih sama dengan waktu jatuh tempo pensiun yang bersangkutan. [GRI 3-3]

## Bantuan Finansial yang Diterima dari Pemerintah

Saham Bank dimiliki oleh enam perusahaan swasta dengan total kepemilikan sebesar 40,70% dan kepemilikan saham oleh masyarakat sebesar 59,30%. Selama tahun pelaporan, Bank menjalankan operasional dan meraih kinerja optimal tanpa menerima bantuan finansial yang diterima dari pemerintah, baik dalam bentuk pembebasan pajak dan kredit pajak, subsidi, hibah investasi, maupun bentuk lainnya. [GRI 3-3, 201-4]

## Obligatory Defined Benefit Pension Plan and Other Pension Plans

The Bank provides post-employment benefits to permanent employees who have reached normal retirement age at the age of 55 based on Law Number 6 of 2023 concerning the Stipulation of Government Regulations in Lieu of Law Number 2 of 2022 concerning Job Creation into Law and Government Regulation No. 35 of 2021 and recognizes post-employment benefit liabilities in accordance with PSAK 24 (Revised 2013) by considering amendments to PSAK 24 of 2015 and slight adjustments to PSAK 24 of 2016. The number of Bank employees entitled to post-employment benefits as of December 31, 2022 was 1,233 employees, and as many as 1,114 employees on December 31, 2023. [GRI 3-3, 201-3]

Post-employment benefits to employees at the Bank refer to the Manpower Law No. 13/2003 in which a certain formula has been determined to calculate the minimum amount of pension benefits. Thus, in essence, a pension plan under the Employment Law is a defined benefit plan. A defined benefit pension plan is a retirement plan that establishes the amount of retirement benefits an employee will receive at retirement, usually based on several factors such as age, length of service or compensation.

Post-employment benefit liabilities are the present value of defined benefit obligations as of the statement date of financial position. Post-employment benefit liabilities are calculated annually by independent actuaries using the projected unit credit method. The present value of defined benefit obligations is determined by discounting the estimated future cash outflows using the interest rate on Government Bonds denominated in the same currency as the reward to be paid and a maturity time approximately equal to the maturity time of the pension in question. [GRI 3-3]

## MENGOPTIMALKAN DAMPAK POSITIF BAGI MASYARAKAT [OJK F.23, F.25]

OPTIMIZING POSITIVE IMPACT ON COMMUNITY [OJK F.23, F.25]

Masyarakat merupakan salah satu pemangku kepentingan eksternal utama bagi Bank Artha Graha Internasional. Penerimaan masyarakat terhadap operasional Bank sangat memengaruhi keberlangsungan dan keberlanjutan bisnis perusahaan, begitu berlaku sebaliknya.

Tingkat penerimaan atau penolakan masyarakat terhadap suatu perusahaan, termasuk Bank, dipengaruhi oleh berbagai faktor di antaranya terkait dampak yang diterima masyarakat, baik dampak positif maupun negatif. Oleh karena posisi masyarakat yang begitu penting, maka Bank berkomitmen agar operasional usahanya memberikan dampak positif sebesar-besarnya bagi masyarakat, sekaligus meminimalkan dampak negatif yang mungkin timbul.

Beragam upaya dilakukan Bank untuk mewujudkan komitmen tersebut. Untuk meminimalkan risiko atau dampak sosial misalnya, Bank melakukan pemetaan sosial guna memotret permasalahan sosial dan ekonomi yang dihadapi masyarakat di sekitar perusahaan beroperasi. Pemetaan sosial sekaligus menjadi sarana bagi Bank untuk melibatkan masyarakat dalam merumuskan solusi terbaik atas dampak yang potensial maupun yang faktual terjadi akibat beroperasinya perusahaan. [GRI 3-3]

Upaya untuk melibatkan masyarakat sehingga mereka mendapatkan dampak positif dan manfaat sebesar-besarnya atas beroperasinya Bank merupakan implementasi kepatuhan terhadap Undang No. 40 Tahun 2007 tentang Perseroan Terbatas, yang di dalamnya mengatur tentang Tanggung Jawab Sosial dan Lingkungan (TJSL). Menurut undang-undang ini, TJSL adalah komitmen Perseroan untuk berperan serta dalam pembangunan ekonomi berkelanjutan guna meningkatkan kualitas kehidupan dan lingkungan yang bermanfaat, baik bagi Perseroan sendiri, komunitas setempat, maupun masyarakat pada umumnya.

Untuk mengimplementasikan TJSL, Bank telah menyusun berbagai program *Corporate Social Safety Responsibility* (CSSR) meliputi pelestarian lingkungan, penanggulangan bencana, sosial kemasyarakatan, dan pemberdayaan masyarakat sebagai upaya Bank untuk memenuhi tanggung jawab terhadap masyarakat. Melalui berbagai upaya tersebut, Bank optimistis akan mampu meraih dukungan dan kepercayaan masyarakat sehingga operasional usahanya berkelanjutan.

*Various efforts are made by the Bank to realize this commitment. To minimize social risks or impacts, for example, the Bank conducts social mapping to capture the social and economic problems faced by communities around its operations. Social mapping is also a means for the Bank to involve the community in formulating the best solution to the potential and factual impacts that occur due to the company's operations. [GRI 3-3]*

Through these various efforts, the Bank is optimistic that it will be able to gain public support and trust so that its business operations are sustainable.*

*In 2023, the Bank spent CSSR funds amounting to IDR9.59 billion, which increased compared to 2022 funds of IDR6.74 billion. In its implementation, the Bank appointed Corporate Secretary as the person in charge of CSSR activities.*

## Program Literasi Keuangan

Bank Artha Graha Internasional mendukung komitmen pemerintah untuk meningkatkan inklusi keuangan melalui berbagai program dan kegiatan yang diselenggarakan oleh lembaga jasa keuangan, termasuk industri perbankan. Sesuai dengan Peraturan Otoritas Jasa Keuangan Nomor 76/POJK.07/2016 tentang Peningkatan Literasi dan Inklusi Keuangan di Sektor Jasa Keuangan Bagi Konsumen dan/atau Masyarakat, literasi keuangan adalah pengetahuan, keterampilan, dan keyakinan, yang mempengaruhi sikap dan perilaku untuk meningkatkan kualitas pengambilan keputusan dan pengelolaan keuangan dalam rangka mencapai kesejahteraan. Adapun inklusi keuangan adalah ketersediaan akses pada berbagai lembaga, produk dan layanan jasa keuangan sesuai dengan kebutuhan dan kemampuan masyarakat dalam rangka meningkatkan kesejahteraan masyarakat. Sementara itu, Peraturan Presiden Nomor 114 Tahun 2020 tentang Strategi Nasional Keuangan Inklusif (SNKI) menyebutkan bahwa inklusi keuangan adalah sebuah kondisi dimana setiap anggota masyarakat mempunyai akses terhadap berbagai layanan keuangan formal yang berkualitas, tepat waktu, lancar, dan aman dengan biaya terjangkau sesuai dengan kebutuhan dan kemampuan masing-masing.

Untuk mengukur indeks literasi dan inklusi keuangan masyarakat, Otoritas Jasa Keuangan (OJK) secara berkala menyelenggarakan Survei Nasional Literasi dan Inklusi Keuangan (SNLIK). Survei terkini diadakan pada Juli-September 2022 dengan responden di 34 provinsi yang mencakup 76 kota/kabupaten dengan jumlah responden sebanyak 14.634 orang yang berusia antara 15-79 tahun. Sebagaimana tahun 2016 dan 2019, SNLIK 2022 juga menggunakan metode, parameter dan indikator yang sama, yaitu indeks literasi keuangan yang terdiri dari parameter pengetahuan, keterampilan, keyakinan, sikap dan perilaku, sementara indeks inklusi keuangan menggunakan parameter penggunaan (*usage*).

Hasil SNLIK 2022 menunjukkan indeks literasi keuangan masyarakat tercatat sebesar 49,68%, naik dibanding tahun 2019 yang mencapai 38,03%. Sementara itu, indeks inklusi keuangan mencapai 85,10%, naik dibanding hasil survei tahun 2019 yang mencapai 76,19%. Hasil survei menunjukkan bahwa *gap* antara tingkat literasi dan tingkat inklusi semakin menurun, dari 38,16% pada tahun 2019 menjadi 35,42% pada tahun 2022. Indeks inklusi keuangan merujuk survei SNLIK 2022 tersebut semakin mendekati target sebesar 90% yang ditetapkan pemerintah sebagaimana disampaikan dalam Peraturan Presiden Nomor 114 Tahun 2020 tentang Strategi Nasional Keuangan Inklusif (SNKI).

Meningkatnya indeks literasi dan inklusi keuangan sebagaimana terungkap dari hasil SNLIK 2022 tak lepas dari kontribusi para pelaku industri perbankan, termasuk Bank Artha Graha Internasional. Selama tahun 2023, Bank turut mendukung peningkatan indeks literasi dan inklusi

## Financial Literacy Program

Bank Artha Graha Internasional supports the government's commitment to increase financial inclusion through various programs and activities organized by financial services institutions, including the banking industry. In accordance with the Financial Services Authority Regulation Number 76/POJK.07/2016 concerning Improving Financial Literacy and Inclusion in the Financial Services Sector for Consumers and/or the Community, financial literacy is knowledge, skills, and beliefs, which affect attitudes and behavior to improve the quality of decision making and financial management in order to achieve prosperity. Meanwhile, financial inclusion is the availability of access to various financial institutions, products and services in accordance with the needs and abilities of the community in order to improve people's welfare. Presidential Regulation Number 114 of 2020 concerning the National Strategy for Inclusive Finance (SNKI) states that financial inclusion is a condition where every member of the community has access to a variety of formal financial services that are quality, timely, smooth, and safe at affordable costs according to their respective needs and abilities.

To measure the index of public financial literacy and inclusion, the Financial Services Authority (OJK) periodically organizes the National Survey of Financial Literacy and Inclusion (SNLIK). The latest survey was conducted in July-September 2022 with respondents in 34 provinces covering 76 cities/regencies with a total of 14,634 respondents aged between 15-79 years. As in 2016 and 2019, SNLIK 2022 also used the same method, parameters and indicators, namely the financial literacy index consisting of knowledge, skills, beliefs, attitudes and behavior parameters, while the financial inclusion index used usage parameters.

SNLIK 2022 results show that the public financial literacy index was recorded at 49.68%, an increase compared to 2019 which reached 38.03%. Meanwhile, the financial inclusion index reached 85.10%, up from 76.19% in 2019. The survey results show that the gap between literacy and inclusion levels is decreasing, from 38.16% in 2019 to 35.42% in 2022. The financial inclusion index referring to the SNLIK 2022 survey is getting closer to the target of 90% set by the government as stated in Presidential Regulation Number 114 of 2020 concerning the National Financial Inclusion Strategy (SNKI).

The increase in the financial literacy and inclusion index as revealed by the SNLIK 2022 results cannot be separated from the contribution of banking industry players, including Bank Artha Graha Internasional. In 2023, the Bank supported the increase in the financial literacy and inclusion

# MENGOPTIMALKAN GREEN BANKING UNTUK KEBAIKAN MASA DEPAN

*OPTIMIZING GREEN BANKING FOR THE FUTURE*

Fokus warga global untuk menerapkan konsep *green economy*, yaitu setiap kegiatan ekonomi harus meminimalkan dampaknya bagi lingkungan, semakin menguat saat ini. Kegiatan ekonomi termasuk di dalamnya pembangunan di semua aspek kehidupan. Tuntutan tersebut tidak lepas dari kondisi faktual yaitu penyelenggaraan pembangunan yang hanya menargetkan pertumbuhan ekonomi akan menyebabkan kesenjangan sosial dan penurunan kualitas lingkungan hidup dengan segala implikasinya.

Operasional usaha industri perbankan tidak berdampak langsung terhadap kelestarian lingkungan maupun kesenjangan sosial. Namun demikian, sebagai lembaga penyalur kredit, perbankan memiliki peran dan tanggung jawab yang tinggi untuk mendukung implementasi *green economy*. Untuk memenuhi tanggung jawab itu, perbankan melakukan transformasi dalam perilaku dan kegiatannya dengan mengusung dan menerapkan *green banking*, yaitu upaya perbankan untuk mengutamakan pemenuhan keberlanjutan dalam kegiatan operasionalnya.

Keberlanjutan ditandai dengan adanya komitmen kalangan perbankan untuk mengedepankan keselarasan antara pencapaian aspek ekonomi, sosial, dan lingkungan hidup. Dengan komitmen seperti itu, selain mengurangi kesenjangan, maka aktivitas perbankan turut berkontribusi untuk menghindari kerusakan lingkungan sehingga bumi menjadi tempat tinggal yang layak. Dalam implementasinya, *green banking* menjadi bagian dari manajemen risiko bank, khususnya berhubungan dengan pelestarian lingkungan hidup serta menumbuhkan kegiatan pembiayaan yang ramah lingkungan. Langkah nyata yang dilakukan bank terkait dukungan dan inisiatif *green banking* antara lain menyediakan produk perbankan hijau (*green product*). Selaras dengan itu, bank juga melakukan seleksi sejak awal terhadap pembiayaan yang diajukan oleh calon debitur dan memutuskan untuk memberikan atau tidak memberikan pinjaman tergantung sejauh mana kegiatan yang akan dibiayai dengan pinjaman bank berdampak pada lingkungan.

Kontribusi perbankan terhadap kelestarian lingkungan merupakan implementasi Undang-Undang Republik Indonesia Nomor 10 Tahun 1998 tentang Perubahan Atas Undang-Undang Nomor 7 Tahun 1992 tentang Perbankan, yang di dalamnya mengatur tentang prinsip kehati-hatian dalam penyaluran kredit. Regulasi tentang perlunya

*Focus of global citizens to implement the concept of green economy, in which every economic activity must minimize its impact on the environment, is getting stronger today. Economic activity includes development in all aspects of life. This demand cannot be separated from factual conditions, namely the development that only targets economic growth will cause social inequality and a decrease in the quality of the environment with all its implications.*

*The business operations of the banking industry do not directly impact on environmental sustainability or social inequality. However, as a lending institution, banks have a high role and responsibility to support the implementation of the green economy. To fulfill this responsibility, banks carry out transformation in their behavior and activities by carrying out and implementing green banking, namely banking efforts to prioritize the fulfillment of sustainability in their operational activities.*

*Sustainability is marked by the commitment of the banking community to prioritize harmony between the achievement of economic, social, and environmental aspects. With such a commitment, in addition to reducing inequality, banking activities contribute to avoiding environmental damage so that the earth becomes a decent place to live. In its implementation, green banking is part of the bank's risk management, especially related to environmental preservation and growing environmentally friendly financing activities. Concrete steps taken by banks related to green banking support and initiatives include providing green banking products. In line with that, banks also make early selections for financing submitted by prospective debtors and decide whether to provide loans or not depending on the extent to which the activities to be financed with bank loans have an impact on the environment.*

*The contribution of banks to environmental sustainability is the implementation of Law of the Republic of Indonesia Number 10 of 1998 concerning Amendments to Law Number 7 of 1992 concerning Banking, which regulates the principle of prudence in lending. Regulations on the need for banks to contribute to environmental sustainability are further*

perbankan berkontribusi terhadap kelestarian lingkungan selanjutnya diatur dalam Undang-Undang Republik Indonesia Nomor 32 Tahun 2009 tentang Perlindungan dan Pengelolaan Lingkungan Hidup. Dalam Pasal 43, ayat (3), huruf c terdapat klausul, Pengembangan sistem lembaga keuangan dan pasar modal yang ramah lingkungan hidup. Dalam perkembangannya, kemudian terbit Peraturan Otoritas Jasa Keuangan No. 51/POJK.03/2017 tentang Penerapan Keuangan Berkelanjutan bagi Lembaga Jasa Keuangan, Emiten dan Perusahaan Publik (POJK Keuangan Berkelanjutan).

Implementasi *green banking* di Indonesia merupakan kontribusi industri perbankan terhadap pelestarian lingkungan dan mengurangi emisi karbon sebagai salah satu penyebab pemanasan global dan perubahan iklim. Dengan demikian, *green banking* merupakan bagian dari gerakan global dalam menghadapi krisis iklim karena menyadari bahwa bencana ekologi bisa mengganggu pertumbuhan ekonomi suatu bangsa, yang berpotensi memengaruhi kinerja industri perbankan.

## Komitmen Bank terhadap Kelestarian Lingkungan

Bank Artha Graha Internasional berkomitmen untuk mendukung konsep *green economy* dengan menerapkan *green banking* dalam menjalankan operasional bisnis. Kebijakan nyata yang diambil Bank antara lain memberlakukan analisis yang mengatur penilaian terhadap upaya yang dilakukan nasabah dalam rangka memelihara lingkungan hidup sebagai unsur kualitas atau syarat pembiayaan. Parameter yang digunakan di antaranya Analisis Mengenai Dampak Lingkungan (AMDAL), Program Penilaian Peringkat Perusahaan dalam Pengelolaan Lingkungan Hidup (PROPER) atau Upaya Pengelolaan Lingkungan/Upaya Pemantauan Lingkungan (UJL/UPL). Ketiga parameter ditelaah guna mencegah risiko terjadinya pencemaran atau kerusakan lingkungan dari proyek-proyek yang dikerjakan nasabah. Penelaahan dilakukan sebagai instrumen penilaian atau penyaringan risiko sosial dan lingkungan yang ditujukan kepada nasabah berupa persyaratan izin lingkungan yang disesuaikan dengan jenis usaha nasabah.

Selaras dengan itu, Bank juga mengeluarkan kebijakan Surat Edaran Kredit No. 117.01.0 Perihal Pembiayaan Proyek Bangunan Gedung Hijau. Melalui kebijakan ini, Bank mendorong agar setiap bangunan memiliki kawasan ramah lingkungan. Bangunan gedung hijau yang dimaksud adalah bangunan yang bertanggung jawab terhadap lingkungan, memiliki kinerja dan performa yang baik, terencana dan terukur secara signifikan dalam penghematan energi, air dan sumber daya lainnya (*efisiensi*) melalui penerapan prinsip bangunan gedung hijau sesuai fungsi dan klasifikasi dalam setiap tahap penyelenggaraannya.

*regulated in Law of the Republic of Indonesia Number 32 of 2009 concerning Environmental Protection and Management. In Article 43, paragraph (3), letter c there is a clause, Development of an environmentally friendly system of financial institutions and capital markets. Subsequently, Financial Services Authority Regulation No. 51/POJK.03/2017 concerning the Application of Sustainable Finance for Financial Service Institutions, Issuers and Public Companies (POJK Sustainable Finance) was released.*

*The implementation of green banking in Indonesia is the contribution of the banking industry to environmental conservation and reducing carbon emissions as one of the drivers of global warming and climate change. Thus, green banking is part of the global movement in facing the climate crisis because it realizes that ecological disasters can disrupt a nation's economic growth, potentially affecting the performance of the banking industry.*

## Commitment to Environmental Sustainability

*Bank Artha Graha Internasional is committed to supporting the concept of green economy by implementing green banking in running its business operations. The real measures of the Bank include applying an analysis that regulates the assessment of the efforts made by customers in order to maintain the environment as an element of quality or financing requirements. The analysis parameters include Environmental Impact Analysis (AMDAL), Company Rating Assessment Program in Environmental Management (PROPER) or Environmental Management/Environmental Monitoring Efforts (UJL/UPL). The three parameters are examined to prevent the risk of pollution or environmental damage from projects undertaken by customers. The review is carried out as an instrument for assessing or screening social and environmental risks addressed to customers in the form of environmental permit requirements tailored to the customer's type of business.*

*Consequently, the Bank issued Credit Circular No. 117.01.0 Regarding Green Building Project Financing. Through this policy, the Bank encourages every building to have an environmentally friendly area. The green building in question is a building that is environmentally responsible, has good performance and performance, planned and measurable significantly in saving energy, water and other resources (efficiency) through the application of green building building principles according to function and classification in each stage of its implementation.*

Adapun implementasi *green banking* secara internal adalah Bank menerapkan operasional kantor yang ramah lingkungan dengan memegang prinsip 3R (*Reduce, Reuse & Recycle*). Prinsip ini diwujudkan melalui pengelolaan yang baik terkait penggunaan bahan baku/material kertas, energi (bahan bakar minyak dan listrik), emisi, air dan air limbah.

Selain itu, Bank juga mengeluarkan kebijakan Pedoman Kebijakan Perkreditan No. 490101.02.1 perihal Pembiayaan Bekelanjutan, Surat Edaran Kredit No. 131.01.0 Perihal Pembiayaan Proyek Energi Terbarukan dan Surat Edaran Kredit No. 128.01.0 perihal Pembiayaan Transportasi Berwawasan Lingkungan. Melalui kebijakan ini, Bank berkomitmen untuk menjadi salah satu penggerak dalam memajukan proyek-proyek yang berkelanjutan, melalui pendekatan yang holistik dan bertanggung jawab dalam pembiayaan proyek energi terbarukan dan transportasi berwawasan lingkungan untuk mewujudkan masa depan yang lebih hijau dan berkelanjutan.

Dalam mendukung proyek energi terbarukan, Bank tidak hanya melihatnya sebagai investasi finansial, tetapi juga sebagai kontribusi nyata terhadap lingkungan dan masyarakat. Bank mempunyai wacana untuk membiayai proyek-proyek yang mencakup pembangunan dan operasionalisasi sumber energi seperti panel surya, turbin angin, dan pembangkit listrik tenaga air. Dengan menyediakan solusi keuangan yang inovatif dan berkelanjutan, Bank akan memberdayakan pengembang proyek untuk merancang dan mengoperasikan infrastruktur energi yang ramah lingkungan, yang pada akhirnya mengurangi jejak karbon dan menciptakan keberlanjutan energi.

Selain itu, Bank juga memiliki wacana dalam pembiayaan transportasi berwawasan lingkungan, yang menjadi salah satu pilar penting dalam perubahan menuju mobilitas yang lebih ramah lingkungan. Kami mendukung proyek-proyek transportasi publik, pengembangan infrastruktur untuk kendaraan listrik, serta inisiatif-inisiatif inovatif lainnya yang mendukung pengurangan emisi dan efisiensi energi dalam sektor transportasi. Melalui pendekatan ini, kami tidak hanya membantu mengurangi polusi udara dan kebutuhan akan bahan bakar fosil, tetapi juga meningkatkan aksesibilitas dan keberlanjutan mobilitas bagi masyarakat.

Komitmen Bank terhadap rencana pembiayaan proyek energi terbarukan dan transportasi berwawasan lingkungan tidak hanya tercermin dalam upaya finansial, tetapi juga akan menjalin kemitraan strategis dengan berbagai pemangku kepentingan. Bank akan bekerja sama dengan pemerintah, perusahaan swasta, lembaga internasional, dan masyarakat sipil untuk menciptakan ekosistem yang mendukung pengembangan proyek-proyek berkelanjutan. Dengan membangun jaringan yang kuat dan berkomunikasi dengan transparan.

Sebagai bank yang berfokus pada masa depan, kami mengakui bahwa energi terbarukan dan transportasi berwawasan lingkungan bukan hanya pilihan, tetapi keharusan untuk menjaga keseimbangan planet kita dan

*The implementation of green banking internally is that the Bank implements environmentally friendly office operations by holding the 3R principle (Reduce, Reuse & Recycle). ## Pemakaian Kertas

Kertas merupakan salah satu kebutuhan penting bagi Bank dalam menjalankan operasional dan administrasi perkantoran. Kertas yang digunakan memiliki jenis dan ukuran yang bervariasi seperti kertas HVS A4 70gr, kertas HVS A4 75gr, kertas HVS A3 80gr, kertas HVS F4 70gr, kertas HVS F4 75gr, kertas thermal EDC ukuran 56 x 33 mm, kertas thermal EDC ukuran 57 x 48 mm, kertas thermal ATM ukuran 80 x 140 mm, kertas telstruk ukuran 58 x 48 mm, kertas continuous form 9½ x 11. Walau berbeda jenis dan ukuran, namun kertas-kertas tersebut termasuk dalam kategori bahan ramah lingkungan karena bisa didaur ulang atau mudah terurai secara alami.

Bank menyadari bahwa bahan baku kertas adalah pepohonan tertentu yang diolah menjadi bubur kertas dan diproses secara khusus, termasuk memanfaatkan energi dan air dalam jumlah yang besar. Untuk itu, Bank berupaya semaksimal mungkin untuk mengurangi penggunaan kertas sehingga turut berkontribusi mengurangi penebangan pohon untuk membuat kertas. Penghematan penggunaan kertas dilakukan antara lain dengan penggunaan 2 (dua) sisi kertas, penggunaan kertas bekas untuk kebutuhan internal, memaksimalkan penggunaan *email* sebagai sarana pengiriman data/dokumen dan memaksimalkan penyimpanan dokumen dilakukan secara digital. Data pemakaian kertas selengkapnya disampaikan pada tabel berikut: [OJK F.5]

## Paper Use

*Paper is one of the important necessities for the Bank in carrying out office operations and administration. The paper that the Bank uses has various types and sizes such as HVS A4 70gr paper, 75gr HVS A4 paper, 80gr HVS A3 paper, 70gr HVS F4 paper, 75gr HVS F4 paper, 56 x 33 mm EDC thermal paper, 57 x 48 mm EDC thermal paper, 80 x 140 mm ATM thermal paper, 58 x 48 mm receipt paper, 9½ x 11 continuous form paper. Although coming in different types and sizes, these different types of paper are included in the category of environmentally friendly materials because they can be recycled or easily decomposed naturally.*

*The Bank realizes that the raw materials of paper are certain trees that are processed into pulp and processed specifically, including utilizing large amounts of energy and water. For this reason, the Bank makes every effort to reduce the use of paper so as to contribute to reducing the cutting of trees to make paper. Paper use management is carried out, among others, by using 2 (two) sides of paper, using waste paper for internal needs, maximizing the use of *email* as a means of sending data / documents and maximizing document storage carried out digitally. The complete paper use data is presented in the following table: [OJK F.5]*

## Pengelolaan Energi

Bank memanfaatkan dua sumber energi untuk menjalankan operasional bisnis, yaitu listrik dan bahan bakar minyak (BBM), yang keduanya diperoleh dari pihak ketiga. Selain untuk penerangan, listrik digunakan untuk sumber energi berbagai peralatan elektronik sarana dan sarana kantor, seperti komputer, laptop, mesin fotokopi, printer, alat pendingin ruangan/AC, mesin ATM, dan lain-lain. Adapun BBM sebagian besar digunakan sebagai sumber energi kendaraan operasional, dan sebagian kecil digunakan sebagai sumber energi genset sebagai alternatif sumber energi cadangan apabila pasokan listrik dari pihak ketiga mengalami masalah. Di Indonesia, BBM dan listrik termasuk dalam kategori sumber energi tak terbarukan yang ketersediaannya semakin terbatas. Listrik masuk kategori ini karena lebih dari separuh pembangkit listrik masih menggunakan batu bara sebagai sumber energi pembangkitnya. Menilik kondisi tersebut, maka Bank berkomitmen untuk melakukan berbagai langkah penghematan. [GRI 3-3]

Program penghematan listrik dilakukan dengan berbagai kebijakan dan program di antaranya mematikan AC dan lampu penerangan saat pulang kerja, memakai penerangan lampu sesuai kebutuhan di luar jam kerja, mematikan komputer bila tidak digunakan, mengatur komputer menjadi *mode sleep* jika tidak digunakan, mematikan peralatan listrik jika tidak digunakan, seperti lampu toilet dan AC. Selanjutnya, mencabut kabel yang terhubung listrik saat pulang kerja, mengganti AC sentral ke AC *Split*, menggunakan lampu LED, jam operasional lift dibatasi selama jam kerja. Adapun langkah efisiensi penggunaan BBM dilakukan melalui kebijakan kebijakan pengaturan rute perjalanan kendaraan dimana kendaraan hanya akan dipakai sesuai kebutuhan dan tujuan yang jelas, mematikan mesin kendaraan saat berhenti lama dan secara rutin melakukan perawatan kendaraan sesuai dengan jadwal yang sudah ditentukan. Upaya penghematan energi yang dilakukan Bank sejalan dengan Instruksi Presiden Republik Indonesia Nomor 13 Tahun 2011 tentang Penghematan Energi dan Air, serta Peraturan Menteri Energi dan Sumber Daya Mineral Republik Indonesia Nomor: 13 Tahun 2012 tentang Penghematan Pemakaian Tenaga Listrik. [GRI 302-4, 302-5] [OJK F.7] [OJK F.12]

Selama tahun pelaporan, Bank menggunakan listrik sebesar 5.847.439 kWh atau setara dengan 21.051 Gigajoule (GJ), turun dibandingkan tahun 2022 yang mencapai 6.186.223 kWh, atau setara dengan 22.270 GJ. Penurunan dipengaruhi oleh kebijakan penghematan listrik sudah dijalankan oleh setiap karyawan di kantor cabang dan kantor pusat. [GRI 302-1] [OJK F.6]

## Energy Management

*The Bank utilizes two sources of energy to run business operations, namely electricity and fuel oil (BBM), both of which are obtained from third parties. In addition to lighting, electricity is used as an energy source for various electronic equipment for office equipment and facilities, such as computers, laptops, copiers, printers, air conditioners, ATM machines, and others. Fuel is mostly used as an energy source for operational vehicles, and a small part is used as a generator energy source as an alternative source of backup energy in the event of electricity supply disruption. In Indonesia, fuel and electricity are included in the category of non-renewable energy sources whose availability is increasingly limited. Electricity falls into this category because more than half of power plants still use coal as their generation energy source. Given these conditions, the Bank is committed to carrying out various savings measures. [GRI 3-3]*

*The electricity saving program is carried out with various policies and programs including turning off air conditioners and lighting when going home from work, using lighting as needed outside working hours, turning off computers when not in use, setting computers to sleep when not in use, turning off electrical equipment when not in use, such as toilet lights and air conditioners. Furthermore, unplugging cables connected to electricity when going home from work, replacing central air conditioners to split air conditioners, using LED lights, limited elevator operating hours during working hours. The fuel efficiency measures are carried out through a policy of setting vehicle travel routes where vehicles will only be used according to clear needs and destinations, turning off the vehicle engine when stopping for a long time and routinely carrying out vehicle maintenance according to a predetermined schedule. The Bank's energy saving efforts are in line with the Presidential Instruction of the Republic of Indonesia Number 13 of 2011 on Energy and Water Saving, as well as the Regulation of the Minister of Energy and Mineral Resources of the Republic of Indonesia Number: 13 of 2012 on Saving Electricity Usage. [GRI 302-4, 302-5] [OJK F.7] [OJK F.12]*

*During the reporting year, the Bank used 5,847,439 kWh of electricity or equivalent to 21,051 Gigajoule (GJ), down compared to 2022 which reached 6,186,223 kWh, or equivalent to 22,270 GJ. The decrease was influenced by the electricity saving policy that has been implemented by every employee at the branch offices and head office. [GRI 302-1] [OJK F.6]*

Untuk mengetahui intensitas konsumsi energi (IKE) listrik, Bank belum melakukan audit energi pada kantor pusat maupun kantor-kantor operasional lainnya. Untuk itu, Bank belum bisa menyampaikan IKE berdasarkan audit energi. Sebagai alternatif, penghitungan IKE dilakukan dengan menggunakan rumus berikut:

$$\text{IKE} = \frac{\text{Pemakaian energi listrik (kWh)}}{\text{Luas bangunan}}$$

To determine the intensity of electrical energy consumption (IKE), the Bank has not conducted an energy audit at the head office or other operational offices. For this reason, the Bank has not been able to submit IKE based on energy audits. Alternatively, the calculation of IKE is carried out using the following formula:

$$\text{IKE} = \frac{\text{Electrical energy consumption (kWh)}}{\text{Building area}}$$

Hasil perhitungan tersebut selanjutnya dibandingkan dengan tabel intensitas konsumsi energi sebagai berikut:

The results of the calculation are then compared with the energy consumption intensity table as follows:

## Pengelolaan Emisi Gas Rumah Kaca

## Greenhouse Gas Emission Management

Emisi gas rumah kaca (GRK) merupakan salah satu isu pemicu terjadinya pemanasan global dan perubahan iklim yang berdampak negatif bagi kehidupan di bumi. Sebagai bagian dari warga dunia, Indonesia berkomitmen untuk mewujudkan *net zero emission* (NZE) pada tahun 2060. Bahkan, kalau bisa lebih cepat dari itu. Program NZE yang bertujuan untuk menekan pencemaran lingkungan yang berpotensi mengakibatkan pemanasan global - terutama emisi gas rumah kaca - menjadi istilah populer setelah diadakannya *Paris Climate Agreement* tahun 2015 dimana Indonesia menjadi salah satu negara yang menandatangani perjanjian tersebut.

Bank berupaya menghadapi pemanasan global dan perubahan iklim diwujudkan dengan menjadi bagian dari *The First Movers on Sustainable Banking* di Indonesia. Dukungan Bank semakin kukuh dengan implementasi konsep green banking yang potensial mengurangi emisi gas rumah kaca. Pengelolaan emisi dilakukan Bank dengan sebaik-baiknya selaras dengan penghematan penggunaan sumber emisi yaitu listrik dan BBM. Dalam laporan ini, emisi yang dilaporkan adalah emisi GRK langsung (cakupan 1) yang dihasilkan dari penggunaan bahan bakar fosil (bensin dan solar), emisi GRK [Cakupan 2] tidak langsung yang bersumber dari penggunaan listrik, dan serta emisi GRK [Cakupan 3] tidak langsung lainnya yang bersumber dari perjalanan dinas dengan pesawat terbang. Emisi GRK dominan yang dihasilkan, baik cakupan 1, 2 dan 3 adalah karbon dioksida (CO<sub>2</sub>).

Bank menghitung emisi GRK [Cakupan 1] langsung dengan merujuk metode yang dipakai di Indonesia dan negara-negara *non-Annex 1* (negara berkembang) yaitu Tier-1 di mana perhitungan berdasarkan data konsumsi energi dikalikan faktor emisi *default* IPCC 2019 (*Intergovernmental Panel on Climate Change*/Panel Antar pemerintah tentang Perubahan Iklim). Rumus yang digunakan adalah sebagai berikut:

*Greenhouse gas (GHG) emissions are one of the issues that trigger global warming and climate change that have a negative impact on life on earth. As a global citizen, Indonesia is committed to realizing net zero emissions (NZE) by 2060, or sooner if possible. The NZE program which aims to reduce environmental pollution that has the potential to cause global warming - especially greenhouse gas emissions - became a popular term after the Paris Climate Agreement in 2015 where Indonesia became one of the signatories to the agreement.*

*The Bank's dealing with global warming and climate change is realized by becoming part of The First Movers on Sustainable Banking in Indonesia. The Bank's support is getting stronger with the implementation of the green banking concept that has the potential to reduce greenhouse gas emissions. The Bank's emission management is carried out as well as possible in line with the savings in the use of emission sources, namely electricity and fuel. In this report, the reported emissions include direct GHG emissions (scope 1) resulting from the use of fossil fuels (gasoline and diesel), indirect GHG emissions [Scope 2] from electricity use, and other indirect [Scope 3] GHG emissions from business travel by aircraft. The dominant GHG emissions produced, both scope 1, 2 and 3 are carbon dioxide (CO<sub>2</sub>).*

*The Bank calculates direct [Scope 1] GHG emissions by referring to the method used in Indonesia and non-Annex 1 (developing countries) countries, namely Tier-1 where calculations based on energy consumption data are multiplied by the default emission factor of the IPCC 2019 (Intergovernmental Panel on Climate Change). The formula is as follows:*

### Emisi Hasil Pembakaran Bahan Bakar *Emissions from Fuel Combustion*

$$\text{Emisi GRK} \left( \frac{\text{kg}}{\text{thn}} \right) = \text{Konsumsi Energi} \left( \frac{\text{TJ}}{\text{thn}} \right) \times \text{Faktor Emisi} \left( \frac{\text{kg}}{\text{TJ}} \right)$$

*GRK Emission*      *Energy Consumption*      *Emissions Factor*

Dari hasil perhitungan sesuai rumus di atas, maka selama tahun pelaporan, Bank menghasilkan emisi gas rumah kaca langsung dari penggunaan solar dan bensin sebesar 925.711 KgCO<sub>2</sub>eq, turun dibandingkan tahun 2022 yang mencapai 989.466 KgCO<sub>2</sub>eq. Penurunan dipengaruhi oleh berkurangnya penggunaan volume BBM selama tahun pelaporan, sekaligus keberhasilan implementasi efisiensi oleh Bank. [OJK F.11]

*From the calculation according to the above formula, the Bank generated direct greenhouse gas emissions from the use of diesel and gasoline amounting to 925,711 KgCO<sub>2</sub>eq during the reporting year, down compared to 2022 which reached 989,466 KgCO<sub>2</sub>eq. The decrease was influenced by the reduction in the use of fuel volume during the reporting year, as well as the successful implementation of efficiency by the Bank.*

Emisi gas rumah kaca tidak langsung dari penggunaan listrik dihitung dengan mengalikan konsumsi listrik (dalam Kwh per tahun) dengan average grid emission factor yang dikeluarkan Kementerian ESDM merujuk RUPTL PLN 2015-2024 yaitu sebesar 0,934 kgCO<sub>2</sub>/Kwh (2017). Berdasarkan perhitungan itu, emisi gas rumah kaca dari penggunaan energi listrik tahun 2023 tercatat 5.461.508 kgCO<sub>2</sub>eq, turun dibandingkan tahun 2022 yang mencapai 5.777.932 kgCO<sub>2</sub>eq. [OJK F.11]

*The indirect greenhouse gas emissions from electricity use are calculated by multiplying electricity consumption (in Kwh per year) by the average grid emission factor issued by the Ministry of Energy and Mineral Resources referring to PLN's RUPTL 2015-2024, which is 0.934 kgCO<sub>2</sub> / Kwh (2017). Based on this calculation, greenhouse gas emissions from the use of electrical energy in 2023 were recorded 5,461,508 kgCO<sub>2</sub>eq, an decrease compared to 2022 which reached 5,777,932 kgCO<sub>2</sub>eq. Perhitungan emisi gas rumah kaca cakupan 3 dari perjalanan bisnis dengan pesawat terbang, Bank menghitung dengan menggunakan kalkulator karbon dari ICAO (*International Civil Aviation Organization*/ Organisasi Penerbangan Sipil Internasional). Dalam laporan ini, emisi gas rumah kaca cakupan 3 merujuk pada perjalanan dinas yang dilakukan oleh Dewan Komisaris dan Direksi. [OJK F.11]

In this report, scope 3 greenhouse gas emissions refer to official trips carried out by the Board of Commissioners and Board of Directors. [OJK F.11]*

Pada tahun pelaporan di atas, emisi gas rumah kaca cakupan 3 dari perjalanan dinas dengan pesawat sebanyak 285 perjalanan tercatat sebesar 26.186 kgCO<sub>2</sub>eq.

Untuk mendukung kebijakan pemerintah terkait perlindungan lapisan ozon, Bank tidak lagi menggunakan bahan perusak ozon seperti freon (CFC) untuk refrigeran/bahan pendingin AC dan kulkas. Bank juga tidak lagi menggunakan Alat Pemadam Api Ringan (APAR) dengan zat pemadam api berupa halon. Sebagai pengganti, Bank menggunakan refrigeran R410A dan R32 untuk AC dan kulkas, serta menggunakan APAR dengan zat pemadam api yang ramah lingkungan yaitu powder dan CO<sub>2</sub>

Terkhusus tentang penanganan emisi udara, dukungan Bank diwujudkan dengan mengelola kendaraan operasional termasuk melakukan uji emisi secara rutin, serta menetapkan usia maksimal kendaraan operasional yaitu 10 tahun. Dengan usia mobil yang lebih muda, maka emisi karbon yang dihasilkan lebih rendah dan memenuhi baku mutu/ambang batas yang ditetapkan pemerintah.

## Pengelolaan Air

Air merupakan salah satu kebutuhan penting bagi Bank, terkhusus dalam menopang keperluan domestik perkantoran, baik untuk karyawan maupun nasabah. Bank memanfaatkan air untuk pembilasan di kamar kecil, wudu, mencuci peralatan dapur, menyiram tanaman, dan sebagainya. Air yang digunakan Bank sebagian besar (80%) dipasok oleh pihak ketiga, yaitu perusahaan daerah air minum (PDAM), dan selebihnya menggunakan air tanah.

Sejalan dengan konsep green banking, Bank menerapkan kebijakan efisiensi penggunaan air karena ketersediaan sumber daya ini semakin terbatas. Pasokan bahan baku untuk PDAM semakin terbatas akibat banyak sumber air baku yang tercemar, sedangkan air tanah ketersediaannya juga kian terbatas seiring dengan semakin masifnya penyedotan untuk berbagai keperluan, termasuk untuk industri, pabrik, perkantoran, perhotelan, dan sebagainya.

Efisiensi penggunaan air penting dilaksanakan guna mencegah krisis atau kelangkaan air bersih. Dalam hal ini, Bappenas dalam Kajian Lingkungan Hidup Strategis (KKLS) RPJM 2019 memproyeksikan ketersediaan air akan mencapai kelangkaan absolut pada 2040. Kelangkaan absolut atau 'absolute scarcity' tak lain adalah jumlah sumber daya air tidak mencukupi untuk memenuhi kebutuhan dan keinginan manusia.

Kebijakan efisiensi penggunaan air dilakukan Bank dengan berbagai kebijakan. Selain menganjurkan kepada seluruh karyawan agar bertanggung jawab dalam pemakaian air, Bank juga membuat pengumuman atau himbauan berupa stiker terkait hemat air di setiap wastafel dan toilet di seluruh kantor cabang, penggunaan air untuk cuci peralatan makan

*In the above reporting year, scope 3 greenhouse gas emissions from official travel by airplane totaling 285 trips were recorded at 26,186 kgCO<sub>2</sub>eq.*

*To support government policies related to ozone layer protection, the Bank no longer uses ozone-depleting materials such as freon (CFC) for refrigerants / refrigerants for air conditioners and refrigerators. The bank also no longer uses Light Fire Extinguishers (APAR) with fire extinguishing agents in the form of halon. As a substitute, the Bank uses refrigerant R410A dan R32 for air conditioners and refrigerators, and fire extinguishers with environmentally friendly fire extinguishing agents, namely powder dan CO<sub>2</sub>*

*Regarding air emissions handling, the Bank's support is realized by managing operational vehicles including conducting routine emission tests, as well as determining the maximum age of operational vehicles, namely 10 years. With a younger car, the carbon emissions produced are lower and meet the quality standards / thresholds set by the government.*

## Water Management

*Water is one of the important necessities for the Bank, especially in supporting domestic office needs, both for employees and customers. The Bank utilizes water for flushing, ablution, washing kitchen utensils, watering plants, and so on. Most of the water used by the Bank (80%) is supplied by third parties, namely regional water supply companies (PDAMs), as well as groundwater.*

*In line with the concept of green banking, the Bank implements a water use efficiency policy because the availability of this resource is increasingly limited. The supply of raw materials for PDAMs is increasingly limited due to many polluted raw water sources, while groundwater availability is also increasingly limited along with the increasingly massive siphoning for various purposes, including for industry, factories, offices, hotels, and so on.*

*Efficient use of water is important to prevent a crisis or scarcity of clean water. In this case, Bappenas in the 2019 RPJM Strategic Environmental Assessment (KKLS) projects that water availability will reach absolute scarcity by 2040. Absolute scarcity is an event in which the amount of water resources is insufficient to meet human needs and desires.*

*Water use efficiency measures are carried out by the Bank with various policies. In addition to encouraging all employees to be responsible for water use, the Bank also makes announcements or appeals in the form of stickers related to saving water at every sink and toilet in all branch offices, the use of water for washing eating or drinking*

atau minum ditetapkan 2 kali dalam 1 hari, menutup kran air usai digunakan dan melakukan monitoring rutin apakah ada kebocoran atau kelalaian lupa menutup kran.

Per 31 Desember 2023, volume penggunaan air tercatat sebesar 33.210 meter kubik, turun dibandingkan tahun 2022 yang mencapai 35.426 meter kubik. Penurunan dipengaruhi oleh kebijakan efisiensi penggunaan air yang sudah sering disosialisasikan ke seluruh karyawan berjalan efektif [OJK F.8]

*utensils is limited to 2 times in 1 day, closing the water faucet after use and conducting routine monitoring whether there are leaks or negligence in forgetting to close the faucet.*

*As of December 31, 2023, the volume of water use was recorded at 33,210 cubic meters, a decrease compared to 2022 which reached 35,426 cubic meters. The decrease was influenced by water use efficiency policies that have often been disseminated to all employees effectively [OJK F. 8].*

## Pengelolaan Limbah

Implementasi konsep green banking dilakukan Bank dengan semaksimal mungkin menerapkan prinsip 3R (*Reduce, Reuse dan Recycle*) dalam pengelolaan limbah. Untuk mengurangi limbah plastik kemasan minuman sekali pakai misalnya, Bank menerapkan kebijakan berupa kewajiban setiap karyawan membawa tumbler pribadi, penyediaan dispenser air minum di setiap ruangan kerja dan ruang rapat, serta penyajian air minum untuk tamu dengan gelas berbahan kaca. Sementara itu, untuk pengelolaan sampah domestik perkantoran, Bank telah menyediakan tempat sampah dalam jumlah cukup dengan pemisahan antara sampah organik dan sampah anorganik.

## Waste Management

*The implementation of the green banking concept is carried out by the Bank as much as possible by applying the 3R principle (Reduce, Reuse and Recycle) in waste management. To reduce single-use beverage packaging plastic waste, for example, the Bank implements policies in the form of the obligation for each employee to bring a personal tumbler, the provision of drinking water dispensers in every workspace and meeting room, and the presentation of drinking water to guests with glass cups. Meanwhile, for office domestic waste management, the Bank has provided a sufficient number of waste bins with a separation between organic waste and inorganic waste.*

## Keanekaragaman Hayati

Bank berupaya mewujudkan lingkungan yang lebih baik tak hanya dengan menjalankan operasional kantor yang ramah lingkungan, tetapi juga dilakukan dengan melakukan konservasi keanekaragaman hayati. Untuk itu, Bank melalui Artha Graha Peduli bekerja sama dengan Balai Besar Taman Nasional Bukit Barisan Selatan (TNBBS) dan Balai Konservasi Sumber Daya Alam Bengkulu melakukan optimalisasi pengelolaan *Tambling Wildlife Nature Conservation* (TWNC) seluas 45.000 hektare, yang merupakan bagian dari Taman Nasional Bukit Barisan Selatan seluas 365.000 hektare yang terletak di ujung selatan. Informasi selengkapnya tentang TWNC bisa diakses melalui situs: <https://inilahallam.com/about/>

## Biodiversity

*The Bank strives to create a better environment is not only by running environmentally friendly office operations, but also by conserving biodiversity. For this reason, the Bank through Artha Graha Peduli collaborates with the Bukit Barisan Selatan National Park Center (TNBBS) and the Bengkulu Natural Resources Conservation Center to optimize the management of *Tambling Wildlife Nature Conservation* (TWNC) covering an area of 45,000 hectares, which is part of the 365,000-hectare Bukit Barisan Selatan National Park located at the southern end. More information about TWNC can be accessed through the website: <https://inilahallam.com/about/>*

## Biaya Lingkungan

Guna mengukuhkan komitmen terhadap lingkungan yang lebih, setiap tahun, Bank mengalokasikan biaya lingkungan yang digunakan untuk membiayai berbagai program terkait lingkungan. Pada tahun 2023, biaya lingkungan tercatat sebesar Rp45,49 miliar, naik dibandingkan tahun 2022 yang mencapai Rp43,95 miliar. Biaya tersebut digunakan untuk biaya keamanan, kebersihan dan iuran lingkungan. [OJK F.4]

## Environmental Cost

*To reinforce its commitment to the environment, the Bank allocates environmental costs that are used to finance various environment-related programs every year. In 2023, the Bank's environmental costs amounted to IDR45.49 billion, up from IDR43.95 billion in 2022. These costs were used for security, cleaning and environmental fees. [OJK F.4].*
